## DESCRIPTION

Department of Periodontology conducted a WORKSHOP in "Management of Gingival Enlargement" in association with Inderprastha Dental College and Hospital, Sahibabad, Ghaziabad from 20<sup>th</sup> to 21<sup>st</sup> October, 2021.

Dr. Preeti Upadhyay, Professor in the Department of Periodontology, Inderprastha Dental College and Hospital, Sahibabad, Ghaziabad. The Speaker for the workshop has numerous publications in indexed international and national journals to her credit. It was a great boost of learning and experience for all the participants who have joined this lecture. Queries and doubts from the participants were very well catered and satisfactory feedbacks received from participants. Model Demonstration exercise was the main attraction of the workshop.

Dr.VikramBlaggana, Head of Department, Department of Periodontology organised the programme with the help of all the coordinators from the department. It was attended by 3<sup>rd</sup> and 4<sup>th</sup> year undergraduates, Internees students from Department of Periodontology. All 208 students were benefitted by the programme.

#### **OBJECTIVE**

Excellent diagnosis is the hallmark of Periodontology. For the successful management of gingival enlargement, the knowledge of the exact Etiology and associated causes is the first priority which will be succeeded by successful management of the disease. This workshop was organised with the objectives of imparting this essential knowledge to the students by giving comprehensive lectures on management of gingival enlargement with model demonstration and hands-on experience. In this programme, we have potentially covered the topic to enrich our attendees with the best of knowledge on Gingival enlargement and its management.

### Department of Paedodontics & Preventive Dentistry

### SUMMARY

Title	Lasers In Pediatric Dentistry	
Speaker	Dr Manish Bhalla Dr Geetika Datta	
Date	7 <sup>th</sup> and 8 <sup>th</sup> September 2021	
Time	9am To 5 Pm	
Working Hours	16 Hours	
Participants	5	

A comprehensive course was conducted by Department of Pedodontics and Preventive Dentistry in which laser and its hard tissue and soft tissue application was explained by Dr Manish Bhalla and Dr Geetika Datta with live demonstration with soft tissue laser was given with diode laser.

Objective: Course was conducted with the objective of training the trainee about functions of laser and how it can aid in Diagnosis and removal of caries, pulp therapy, decreasing the risk of infection, swelling and inflammation, reducing bleeding, enhancing soft tissue healing, pain relief and reducing gag reflex are among the applications of laser in paediatric dentistry. Having a less painful first dental experience by the use of laser can be an efficient preventive and therapeutic strategy in paediatric dentistry. Due to minimal invasion, laser treatment is well tolerated by children. Improved patient cooperation leads to higher satisfaction of the parents, dentists and the children themselves.

### TOBACCO DEADDICTION PROGRAM

### PREAMBLE

Tobacco consumption is known to lead to serious health problems. Whether you smoke or chew tobacco, its effects are quite dangerous, on both, physical and mental health. Smoking or chewing tobacco gives you a momentary feeling of high. But then, the nicotine substance present in tobacco is addictive in nature and you end up craving for more. Eventually, it becomes your habit, or let's say addiction.

A vast quantity of scientific, clinical and epidemiological data shows that tobacco is and its carcinogenic pathways affects the oral and systemic health. Building an infrastructure in health systems that encourages and facilitates cessation and expanding the accessibility of treatments are necessary. Comprehensive tobacco control programs can significantly reduce the prevalence of tobacco use and hence it is necessary to train dental health professionals including undergraduates for de-addiction counselling.

TCC unit, Public Health Dentistry Department, IPDC designed 2 Day program titled "TOBACCO DE-ADDICTION TRAINING" for students of the institute. This value added course is designed with the aim of enhancing counselling skills for de-addition among dental students.

## PERFORATION REPAIR - 2021

TITLE	PERFORATION REPAIR
SPEAKER	DR DAKSHITA JOY SINHA
DATE	11-12 <sup>th</sup> JUNE 2021
MODULE 1:	LECTURE AND DEMONSTRATION
MODULE 2:	HANDS-ON ACTIVITY
HOURS	16 HOURS
TIME	9:30am Onwards
PARTICIPANTS	160

A Course was conducted on Perforation Repair in Endodontics. Perforation is an artificial communication between the root canal system and supporting tissues of the teeth. Root perforation complicates the treatment and deprives the prognosis if not properly managed. The course enlightened about the new root repair materials available. Therefore, this course was implemented in our department for students to make them aware of this method for better treatment outcome in clinics and successful endodontic treatment. The lecture and hands-on was conducted by Dr Dakshita Joy Sinha. The course was successfully attended by 160 participants.

## Module 1

- Inauguration Diya was lit by the chief guest and organising committee members followed by Saraswati vandana by the students.
- Lecture was taken by Dr Dakshita Joy Sinha, on perforation repair, how to manage the cases and handling of newer introduced materials.

- The demonstration for the course was done under dental operating microscope.
- The perforation repair using new introduced materials was observed by all the post graduate students under the microscope.

#### Module 2:

- The Hands-on activity was performed by the Post Graduate students done under dental operating microscope on extracted teeth.
- Post hands—on all the queries were discussed and resolved in a group discussion.
- Felicitation was done for the guest speaker at the end of the course.

#### SUMMARY

Title	Lasers In Pediatric Dentistry
Speaker	Dr Manish Bhalla
Date	17th and 18th December 2019
Time	9 am to 5 pm
No of Hours	16 hours
Participants	232

Hands on program on "LASERS IN PEDIATRIC DENTISTRY" was conducted by Department of Pedodomics and Preventive Dentistry on 17th and 18th December 2019 by Dr. Manish Bhalla (MDS, Pedodomist) in which laser and its hard tissue and soft tissue application was explained with live demonstration with soft tissue laser was given with diode laser.

OBJECTIVE: The aim of the course was to make the students understand about the functions of laser and how it can aid in diagnosis. Removal of caries, pulp therapy, decreasing the risk of infection, swelling and inflammation, reducing bleeding, enhancing soft tissue healing, pain relief and reducing gag reflex are among the applications of laser in paediatric dentistry. Having a less painful first dental experience by the use of laser can be an efficient preventive and therapeutic strategy in paediatric dentistry. Due to minimal invasion, laser treatment is well tolerated by children. Improved patient cooperation leads to higher satisfaction of the parents, dentists and the children themselves.

#### INSTRUMENT RETRIEVAL - 2019

TITLE	INSTRUMENT RETRIEVAL
SPEAKER	DR NIKHIL PURI
DATE	20th and 21st NOVEMBER 2019
MODULE 1:	LECTURE AND DEMONSTRATION
MODULE 2:	HANDS-ON ACTIVITY
HOURS	16 HOURS
TIME	9:30am Onwards
PARTICIPANTS	165

A Course was conducted on INSTRUMENT RETRIEVAL in Endodontics. The separated instrument, particularly a broken file, leads to metallic obstruction in the root canal and impedes efficient cleaning and shaping. When an attempt to bypass such a fragment becomes difficult, it should be retrieved by mechanical devices. The course enlightened about different technique in removal of separated instruments in anterior and also the posterior teeth were discussed. Therefore, this course was implemented in our department for students to make them aware of this method for better treatment outcome in clinics and successful endodontic treatment. The lecture and hands-on was conducted by Dr Nikhil Puri. The course was successfully attended by 502 participants.

#### Module 1

- Inauguration Diya was lit by the chief guest and organising committee members followed by Saraswati vandana by the students.
- Lecture was taken by Dr Nikhil Puri, on instrument retrieval, how to manage the cases.
- The demonstration for the course was done under dental operating microscope.

 The Instrument Retrieval wasobserved by all the post graduate students under the microscope.

#### Module 2

- The Hands-on activity was performed by the Post Graduate students done under dental operating microscope on extracted teeth.
- Post hands—on all the queries were discussed and resolved in a group discussion.
- Felicitation was done for the guest speaker at the end of the course.

#### DESCRIPTION

Department of Periodontology conducted a value-added course "Periofix" in association with Inderprastha Dental College and Hospital on 18<sup>th</sup>-19<sup>th</sup> November, 2019. Dr. Vikram Blaggana MDS Periodontics and Implantology gave an informative lecture on management of periodontally compromised teeth with mobility requiring a supportive periodontal treatment. Hands on training session was conducted by Faculty for students on cast models and different types of splinting methods were demonstrated.

Dr. Preeti Upadhyay and Dr. Pragya Tripathi gave an insight on various splints as an adjunct to periodontal therapy.

They gave a comprehensive lecture to the undergraduate and postgraduate students with various types of splints for an outstanding learning experience. The session was attended by 91 students.

Organising Secretary

#### **OBJECTIVE**

Ultimate goal of periodontal treatment is to maintain the tooth and gingiva that encompasses the prevention, diagnosis and treatment of artificial substitutes. Periofix is philosophy that ensures teeth are kept functional. Splinting of teeth to each other allows distribution of forces from mobile teeth. It is considered best practice to maintain the repositioned tooth in the correct position, provide patient comfort and improve function. Therefore, by covering this topic in our value-added course we enriched our attendees with the methods of saving teeth and maintaining the arch integrity.

# TOBACCO DEADDICTION PROGRAM

#### PREAMBLE

Tobacco consumption is known to lead to serious health problems. Whether you smoke or chew tobacco, its effects are quite dangerous, on both, physical and mental health. Smoking or chewing tobacco gives you a momentary feeling of high. But then, the nicotine substance present in tobacco is addictive in nature and you end up craving for more. Eventually, it becomes your habit, or let's say addiction.

A vast quantity of scientific, clinical and epidemiological data shows that tobacco is and its carcinogenic pathways affects the oral and systemic health. Building an infrastructure in health systems that encourages and facilitates cessation and expanding the accessibility of treatments are necessary. Comprehensive tobacco control programs can significantly reduce the prevalence of tobacco use and hence it is necessary to train dental health professionals including undergraduates for de-addiction counselling.

TCC unit, Public Health Dentistry Department, IPDC designed 2 Day program titled "TOBACCO DE-ADDICTION TRAINING" for students of the institute. This program is designed with the aim of enhancing counselling skills for de-addition among dental students.

### Department of Conservative Dentistry & Endodontics

Title	Root Canal - The 3-D way
Speaker	Dr. Dakshita Joy Sinha
Date	19/4/19 to 20/4/19
Hours	15 hours
Time	9am to 4.30 pm
Participants	407

Root canals are one of the most common procedures done in dental practise. Newer materials and techniques are introduced yearly for precision to deliver the treatment to the patient. Treating the root canal in a 3 Dimensional way is of utmost importance.

The guest speaker was Dr Dakshita Joy Sinha , MDS (Conservative Dentistry & Endodontics).

She educated the students about the various 3 dimensional obturation techniques and its advancements. She demonstrated the root canal technique and helped the students during the hand on course.

Dr. Anika Mittal

## Summary

1.	Title	DIGITAL DENTAL PHOTOGRAHY
2.	Speaker	Dr Mayur Dawda
3.	Date	11/02/2019 & 12/02/2019
4.	Time	8 .30 am to 3.30 pm
5.	No .of Hours	14 hours
6.	No. of Participants	240
7.	Organizing Coordinator	Dr Manika Mittel

Digital photography has revolutionized the entire dental practice and the way clinicians diagnose, treat, and communicate with patients and colleagues. A pictorial documentation of every case has many advantages. Right from the first step of diagnosis to the last step of post-operative analysis and maintaining records, dental photography has a vital role to play in the life of every dental practitioner. Furthermore good images are a prerequisite for publications and scientific research. Hence this course is being organized.

#### Day 1

- Introduction to Cameras, Lenses and Flashes
- Photography Basics,
- Which equipment is THE BEST for dental photography?
- The Reverse Concept (Our Signature Lecture)
- Know the DSLR camera
- Exposure Triangle
- DISCUSSION AND HANDS-ON IN DETAIL
- Basic Editing like exposure corrections, composition correction, converting files and saving files for various purposes like online sharing or print.

#### Day 2

- What is Standardization?
- How to Maintain Standardization?
- Magnification Ratios,
- Manual focusing techniques.
- How to get the Sharper Images
- EXTRAORAL PHOTOGRAPHY PROTOCOL
- INTRAORAL PHOTOGRAPHY PROTOCOLS
- Using intra oral accessories most effectively
- DISCUSSION AND HANDS-ON IN DETAIL
- Basic Editing like exposure corrections, composition correction, converting files and saving files for various purposes like online sharing or print.

Objectives Achieved: Dental photography has become so specific, complex, and multi-tasking that it can be considered a special kind of photography. This course gave an insight into various principles governing the dental photography, to learn this skill, to dispel fallacious misconceptions about dental photography, simplify technical aspects and concentrate on the bare essentials necessary for dental applications, that can be readily incorporated into a busy dental practice to ensure a high standard of practice and achieve superlative images

#### DESCRIPTION

Department of Periodontology conducted a WORKSHOP in "The Art of Sutures and Suturing Techniques" in association with Inderprastha Dental College and Hospital, Sahibabad, Ghaziabad from 12<sup>th</sup> to 13<sup>th</sup>September 2018.

Dr. Pragya Tripathi, Reader in the Department of Periodontology, Inderprastha Dental College and Hospital, Sahibabad, Ghaziabad who earned over a decade of experience in her field was the Speaker for the workshop. It was an enriching experience for the undergraduates who were a part of this lecture and demonstration of the art of suturing. Queries and doubts from the participants were very well catered and satisfactory feedbacks received from participants.

Dr.VikramBlaggana, Head of Department, Department of Periodontology organised the programme with the help of all the co-ordinators from the Department. It was attended by 3<sup>rd</sup> and 4<sup>th</sup> year undergraduates, Interns and postgraduate students from Department of Periodontology. Total of 157 students participated in the programme.

#### DESCRIPTION ABOUT THE PROGRAM:

#### Day 1: Concepts of occlusion

Introduction of full mouth rehabilitation.

Indications of FMR.

Different occlusal schemes in natural dentition.

Difference in static and dynamic occlusion.

#### Day 2: Importance of centric relation and health of TMJ

Basic anatomy and physiology of temporomandibular joint.

Signs and symptoms of TMJ problems (in brief).

Relation of TMJ and occlusion.

Importance of centric relation.

Difference in maximum intercuspal relation and centric relation.

#### Day 3: Case selection and different techniques of FMR

Importance of articulators in FMR.

Understanding semi-adjustable articulators.

Case selection criteria for FMR.

Techniques of FMR.

Difference in Hobo and Pankey Mann Schuyler techniques.

#### Day 4: Case presentations/ case studies & problems encountered during FMR

FMR case presentations done with different techniques.

Steps to perform in FMR cases.

Tips and tricks in tooth preparation.

Common problems encountered during FMR and how to avoid them.

#### Day 5: Hands-on for face-bow transfer and recording centric relation records

Hands on for recording face bow in patient and transferring to semiadjustable articulators.

Recording of centric relation in patient.

Mounting of maxillary and mandibular casts.

#### OBJECTIVES ACHIEVED:

Students learned the multidisciplinary approach towards full mouth rehabilitation and step by step treatment execution in various cases with different treatment approaches.

They understood the importance of functional stability in Cosmetic Dentistry.

### Department of Paedodontics & Preventive Dentistry

#### SUMMARY

Title	Bruxism "Possible Cause & What Can We Do"		
Speaker	Dr Kapil Gandhi Dr Manish Bhalla		
Date	15th And 16th January 2018		
Time	9am To 5 Pm		
Working Hours	16 Hours		
Participants	7		

A comprehensive Course on BRUXISM was conducted by Department of Pedodontics and preventive dentistry on 15th and 16th January 2018 by Dr. Kapil Gandhi & Dr Manish Bhalla at Inderprastha dental college and hospital.

The aim of the course was to make participants understand what is bruxism, etiology of bruxism, its impact on temporo-mandibular joint, strategies to manage bruxism to various therapeutic modalities and also to train the trainee about the significant damages that occurs to the teeth if a child keeps elenching and grinding for an extended period. The enamel will not only wear down, but the teeth may chip, flatten or fracture. In instances of prolonged and frequent teeth-grinding, there's a chance of developing temporo-mandibular joint disorder (TMD). TMD causes further pain in the jaw and can make it difficult for a child to chew or open their mouth completely. Therefore training of trainees was done on fabrication of custom mouth guard or night guard for patient wear at night to prevent grinding and residual soreness.

## LASERS IN PERIODONTOLOGY-2017

TITLE	LASERS IN PERIODONTOLOGY	
SPEAKERS	Dr. Smriti Bhargava	
DATE	20-21 SEPTEMBER 2017	
TIME	9 AM TO 5PM.	
PARTICIPANTS	82	
ORGANIZING SECRETARY /ORGANISING CO-ORDINATOR	Dr. Pragya Tripathi 9354044845 dr.pragya.trip@gmail.com	

#### DESCRIPTION

Department of Periodontology conducted a course in Lasers in Periodontology in association with Inderprastha Dental College and Hospital from 20-21<sup>st</sup> September 2017. Dr. Smriti Bhargava, the Clinical Product head and Laser specialist at Unicorn DenmartPvt. Ltd. gave an insight on Lasers in Periodontology enhancing the various aspects of Laser applications in Periodontology. It was clearly understood by all that detail knowledge of laser functioning enables the dental professional to use laser technology expressly for the benefit of the patient and within a safe environment. Dr. VikramBlaggana, Head of Department, Department of Periodontology organised the programme with the help of all the co-ordinators from the department. It was attended by interns and postgraduate students. Demonstration was given on Goat head and students have practiced using lasers on the same.

A total of 82 students comprising of Interns and Post graduates of various Departments have attended the programme.

Organizing Secretary

Tota Triban

### **OBJECTIVE**

Conventional mechanical treatment has various limitations in techniques and effects, and lasers have been introduced as an adjunctive or alternative tool for various Periodontal procedures. In this programme, we have potentially covered the topic to enrich our attendees with the best of knowledge on the application of Lasers in Periodontology.

7.	NO. OF PARTICIPANTS	180

#### ABOUT THE PROGRAM

Evidence-based dentistry (EBD) is an approach to oral health care that requires the judicious integration of systematic assessments of clinically relevant scientific evidence, relating to the patient's oral and medical condition and history, with the dentist's clinical expertise and the patient's treatment needs and preferences.

Evidence-based dentistry (EBD) is based on three important domains: the best available scientific evidence, a dentist's clinical skill and judgment, and each individual patient's needs and preferences. This course focuses on how EBD differs from a traditional approach to making clinical decisions, explains how EBD incorporates evidence with clinical expertise and patient preferences, and covers the basics of research design, levels of evidence, statistical concepts and the limitations of published research.

#### COURSE CONTENTS

#### MODULE I

- INTRODUCTION
- · QUESTION FORMULATION
- LEVELS OF EVIDENCE
- SOURCES OF EVIDENCE
- QUESTIONS & ANSWERS ROUND FOLLOWED WITH A QUIZ

#### MODULE II

- SOURCES OF EVIDENCE
- PROS & CONS OF KEY EVIDENCE RESOURCES
- HOW GOOD THE EVIDENCE
- CLOSING DISCUSSION
- QUESTIONS &ANSWERS ROUND FOLLOWED WITH A QUIZ

#### **OBJECTIVES ACHIEVED**

All the students got to know about the importance of evidence in health care, they learned about how to orient themselves to the great amount of scientific information, and to support clinical decisions which is well established in health care. With the practice of evidence-based medicine students are able to self-direct them, solve their problem on the basis of learning which leads to the need for clinically important information about diagnosis, prognosis, therapy and other clinical and health care issues. Nowadays the practice of dentistry is becoming more complex and challenging because of the continually changing dental materials and equipments, an increasingly litigious society, an increase in the emphasis of continuing professional development, and information explosion and the consumer movement associated with advances on the internet. They also learned about the aim of evidence-based practice is systematic literature review, which synthesizes the best evidences and provides the basis for clinical practice guidelines.

Title	Indirect Restorations	
Speaker	Dr. Agam Bhatnagar	
Date	08/8/17 to 09/8/17	
Hours	15 hours	
Time	9am to 4.30 pm	
Participants	363	

Grossly decayed tooth not involving pulp generally require full coverage restoration. These type of tooth are difficult to restore via direct restorations. Indirect restorations not only ease the work for the dentist but are help in delivering high quality product to patient.

The Guest Speaker of the Day was Dr Agam Bhatnagar, MDS (Conservative Dentistry and Endodontics). He enlightened the students with his knowledge and experience on the use of indirect restorations. He discussed about the various techniques which help participants to upgrade their skills.

(anising secretary)

The Lecture was successfully attended by 363 students.
