

SUMMARY

A programme on **Dentistry Unleashed with Magnification** was organised by **Department of Conservative Dentistry and Endodontics** in collaboration with the departments of Pedodontics and Prosthodontics. The lecture and hands-on was conducted by Dr Nikhil Bahuguna at Inderprastha Dental College and Hospital. This programme enlightened the Faculty of Pedodontics, Endodontics and Prosthodontics Departments about the benefits of using Microscope in Dental practice and its various uses in respective branches of dentistry like:

ENDODONTICS

- Locating tiny/hidden canals blocked by calcification
- Perforation repair

PROSTHODONTICS

- Assistance in crown preps and implant procedures
- Removal of post and in post space preparation

PEDODONTICS

- Assistance in caries removal and restoration
- Access cavity preparation in deciduous teeth

Using a **Dental Operating Microscope** in these fields not only enhances the vision but also improves the precision and thereby the efficiency of the operator. The programme was attended by 41 faculty members.

WORKSHOP ON CLEAR ALIGNERS

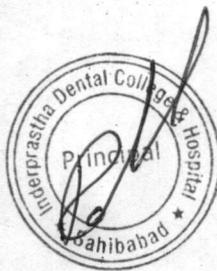

Department of Orthodontics and Dentofacial Orthopaedics held a Training and Hands on session of aligners fabrication in association with **Department of Pedodontics and ODS Company** on 27 October 2021 in IPDC.

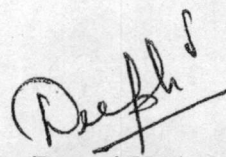

Dr Swapnil Gupta, CEO and Director and **Dr Monalisa Bose** gave introduction to clear aligners, Biomechanics for aligners, case selection for ODS aligners, IPR and auxiliaries with ODS aligners, aligners for Pedodontic patients and trouble shooting. A total of 18 participants were present in the workshop.

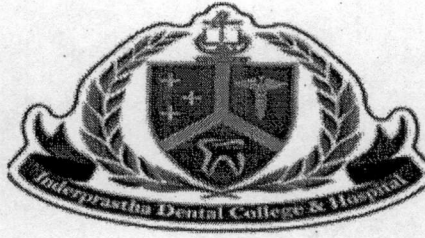

They gave insight into aligner fabrication, designing product applicability and predictability to address a wide range of cases from simple to complex with the help of customized attachments and accessories, many extractions as well as non-extraction cases are feasible with clear aligners due to advances in treatment methodology.

All the faculty members benefitted immensely from this workshop.

ELISA Plate

- ☐ 96 well plate
- ☐ Made of plastic on which protein can be adsorbed (bind) easily
- ☐ Usually done overnight @ 4°C
- ☐ Special buffer used that will not denature Ab and maximize binding
- ☐ Blocking step ensures no empty spaces are left

- Antigen binding
- Light-chain hypervariable regions
- Light chain
- Heavy chain
- Heavy-chain hypervariable regions
- Interchain disulfide bonds
- Intrachain disulfide bonds
- Biological activity mediation
- Protein cleavage site
- Hinge region
- Protein cleavage sites
- Complement-binding region
- Carbohydrate
- V_L and V_H variable regions
- C_L and C_H constant regions
