

Strategic plan for development and deployment:

The HOI in collaboration with IQAC and Academic committee is in the process of initiating a dedicated facial and maxillofacial rejuvenation clinic which will not only provide state of the art esthetic rehabilitation to patients, but will also train professionals and facilitate advanced learning in the institute.

The Geriatric clinic which is already functional is now being developed further to benefit the elderly in availing prompt treatment in least possible appointments.

Advanced software's have been introduced in the functioning of IPDC to facilitate academic planning and development, finance and accounts and administration.

Recognizing the impact of climate change, the institute has formulated e-governance policy to be implemented on all levels including student records with the goal of paperless functioning.

Multiple lectures and webinars are conducted by the academic committee, research cell, ethical committee and the Principal in collaboration with renowned speakers and research institutes in order to ignite young minds. In order to encourage further research more emphasis is being given to progress from research projects to patents and copyrights. In alignment with the vision of National Education Policy (NEP-2020) the faculty is encouraged to attend various courses in order to upgrade their knowledge and skills regarding current higher educational goals and guidelines.
